EXAMINER'S AMENDMENT

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on August 22, 2005, Alan A. Bornstein requested an extension of time for ONE (1) MONTH and authorized the Director to charge Deposit Account No. 12-1155 the required fee of \$120.00 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

2.1. In claim 1:

a) line 3, "5%" has been replaced with --3%--;

b) line 7, "styrene," has been deleted.

2.2. In claim 6, line 1, "claim 4" has been replaced with --claim 1--.

STATEMENT OF REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The claims in their present amended forms have overcome the prior art of record, including the newly found art to Roberts et al. (US Patent No. 6,727,215) and Fisher et al. (US 2002/0123444). Upon careful consideration, JP 05168686 in view of Ness, the close prior of record, as they apply to the present amendment, is overcome in view of Applicants' arguments,

Art Unit: 1751

i.e., there is no suggestion or motivation to combine JP '686 reference which is concerned with a package for treating filth and Ness reference which is concerned with fabric treatment. Roberts, a newly found art, teaches an article made of water-reactive material (see abstract) which comprises at least two pouches comprising therein a first and second composition (see col. 2, lines 34-50), wherein the first and/or second composition comprises from 5% more preferably from 10% by weight of the composition of surfactant (see col. 9, lines 56-60), and from 0.05% to 15% by weight of the composition of perfume oil or perfume composition, the perfume composition comprising a carrier material comprising a styrene monomer. Fisher, another newly found art, teaches similar features as in Roberts reference, see abstract; page 5, section [0076]; page 8, sections [0109-0110]. It is clear therefore that each of Roberts and Fisher teaches an amount of surfactant which is outside the scope of the present amended claims and fails to teach the carrier material for the perfume as those recited. Accordingly, the subject matter, as a whole, would not have been obvious to one of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
